TORONTO

natural earthy finishes

A warm, earthy palette of colours makes the kitchen an inviting and versatile space. Colours inspired by nature, such as shades of green, blue, yellow and rust will be popular, as well as all tones of woods.

show stopping elements

Focal pieces in a kitchen make the space feel unique and reflective of a homeowner's personality and taste. Use bold accents and/or show stopping backsplashes that complement the overall kitchen design.

vintage inspired décor & finishes

Details and accents in brass, bronze and black metal against wood and lacquered finishes set the scene for a modern, yet cozy and warm kitchen.

open shelving & room dividers

Open shelving can be both functional and aesthetic. Aside from displaying dinnerware and cookbooks, they can also be used as space to add greenery and treasured collectibles.

glass door cabinets

Glass doors make the kitchen space look more spacious, and can be used in different levels of transparency. Light incorporated in glass cabinets can truly elevate the kitchen, for a contemporary, sleek and stylish look.
